## BOSS SHIPS NEW LINE OF PROFESSIONAL TUNERS

*“Stay Tuned” with BOSS Tuners for Guitar, Bass, Brass and Wind Instruments*

**Los Angeles, CA, May 12, 2009** — BOSS is proud to announce the availability of a new full line of tuners for every price range and level of musician with the TU-1000, TU-12EX, TU-12BW, and TU-88 digital tuners.

### [TU-1000: Professional Stage Tuner](#)

Featuring a huge, striking, high-intensity LED meter for visibility on dark stages or outdoors, the flagship TU-1000 offers ultra-smooth, accurate motion and superior brightness to make tuning fast and easy. Its unique floorboard design powers up to six effects processors and includes two audio outputs. The TU-1000 is the new tuner of choice for the professional touring guitarist.

### [TU-12EX: Chromatic Tuner for Guitar and Bass](#)

The TU-12EX features the famous BOSS needle-type meter and LED tuning guide in a sleek thin-line body and compact size. New features include a flat tuning function, reference tone, auto-off, and Accu-Pitch™, which helps musicians verify their tuning by sounding a beep when the correct tuning is reached.

### [TU-12BW: Chromatic Tuner for Brass and Wind](#)

The TU-12BW features an expanded tuning range to correspond to a wide range of brass and wind instruments. Featuring the famous BOSS needle-type meter and LED tuning guide, the TU-12BW also includes a Contact Mic and dedicated Holder to attach on music stands.

### [TU-88: Micro Monitor and Tuner](#)

The BOSS TU-88 brings stylish, portable, and accurate LCD tuning to musicians at an affordable price. In addition to authentic BOSS' tuner and metronome features, the TU-88 features a built-in headphone amplifier, so players can directly monitor or record sounds from stomp boxes or electric guitars with the built-in speaker simulator. Guitarists can also jam along with songs from a CD or MP3 player with the new mix input function.
