

# ATELIER<sup>®</sup>

# AT-10S

A Simple, Affordable Way to Enjoy Playing the Organ.

Roland<sup>®</sup>

Bringing you the fun of organ playing with one of our most popular models.

## Amazingly High-Quality Organ and Realistic Orchestral Sounds

Like all Atelier Series organs, the AT-10S brings you some of Roland's finest organ and orchestral sounds—from basic jazz organ, theater organ and pipe organ to strings, choir and jazz scat voices.

An onboard rotary effect with selectable rotary speed can also be used with jazz and full organ sounds to play amazingly realistic tone cabinet sounds.

## Automatic Accompaniment Features—Play Simply, Sound Professional

The AT-10S boasts 35 onboard rhythm patterns in styles ranging from Big Band, Swing and Country to Latin. Beginners will love the Chord Intelligence function, which creates complete auto-accompaniment from just one or two notes played with the left hand. Right-hand only melodies can even be enhanced with automatic Harmony Intelligence. These amazing features make it possible for anyone to have fun playing the organ.

## Expand Your Possibilities with the Built-in Floppy Disk Drive

The AT-10S has a built-in 3.5-inch floppy disk drive that can be used to load and play commercially available Standard MIDI File disks from around the world. You can enjoy listening to MIDI music, or play along with the performance. The onboard sequencer can also be used to record performances or practice sessions and save the data to a floppy disk—a great way to hear how you're doing, or share your music with friends.

## Wonderfully Easy to Use

Built on the concept of making our Atelier organs easy to play right from the start, the AT-10S has been designed with a new front-panel layout for simple operation and easy access to the organ's many features. In fact, just by pressing the convenient One Touch Program button, you can set the AT-10S to automatically arrange various aspects of your performance, including voice assignment, accompaniment tempo, and sync-start. So even if you've never played an Atelier organ before, you'll be making music right away with the AT-10S!

## Bright LCD That Can Even Display Lyrics!

A backlit LCD display on the front panel makes it easy to visually check function settings such as tone name, tempo, measure, and chords. The LCD can also display the song lyrics included in compatible SMF disks—perfect for singing *karaoke*. And with the new Beat Indicator, you'll never lose track of the beat. The special Beat Indicator LEDs act like a metronome to display the beat of the song and keep you right in time.
