

ATELIER®

AT-5

It's Easy, It's Fun!

Everything you need for more playing enjoyment

Superb Organ Sound & Realistic Rhythms

The AT-5 offers a selection of exceptionally authentic, high-quality organ sounds including full organ, jazz organ, pipe organ and theater organ. You can also enjoy a range of other top-quality instrument sounds such as piano, strings and guitar. And you can have fun performing with realistic rhythms that are actual recordings of professional drummers.

One Touch Program

Having fun with the AT-5 is easy. How? Just play one or two notes with your left hand and Automatic Accompaniment provides accompaniments with the feel of a real band. All you have to do is choose a rhythm, such as Swing, Latin, Waltz or Polka, and then push the One Touch Program button. After that, you can enjoy playing melodies with a beautiful accompaniment.

Harmony Intelligence

For even more single-finger playing fun, Harmony Intelligence automatically adds beautiful harmonies to your melody performances.

Floppy Disk Drive Flexibility

To enable more effective lessons and more enjoyment, the AT-5 features a floppy disk drive. Using disks means you can playback and play along with a huge variety of SMF (Standard MIDI files) from around the world. Naturally, you can also record your own performances and then store them on disks.

* With the AT-5, you can use music files that carry any of these marks:

Club Roland Express is a new accelerated version of the popular Club Roland program. Perfect for students of all ages, this interactive course is designed so that participants can experience the joy of making music more quickly. It's the perfect way to get comfortable playing a new Roland instrument—and it's fun!
