BOSS RELEASES THE FZ-5 FUZZ PEDAL

— A Distorted Blast from the Past —

Los Angeles, CA, January 18, 2007—BOSS is proud to announce the FZ-5 Fuzz Pedal. This modern pedal is built for the modern guitarist, but the sounds you can get from the FZ-5 are pure retro. Looking back at the glorious rock sounds of the '60s and '70s, the FZ-5 recreates its vintage fuzz through BOSS state-of-the-art COSM® modeling.

Recall the fuzz-filled flavors of classic pedals such as the Maestro FZ-1A, Fuzz Face, and Octavia pedals, and kick 'em into overdrive with the FZ-5's Boost knob.

BOSS' proprietary COSM modeling technology allows guitar players to recreate classic fuzz BOOST control for more aggressive tone.

Housed in BOSS's classic indestructible compact pedal design, the new FZ-5 is the perfect weapon for players wanting to beef up their rigs with classic retro fuzz artillery.
