BOSS RELEASES THE NEW ML-2 METAL CORE

— Extreme Metal in a Compact Pedal —

Los Angeles, CA, January 18, 2007—With its extreme gain, the ML-2 is the most potent and heavy distortion pedal ever created by BOSS. It easily delivers massive distortion and gain with heavy lows for playing Nu Metal, Grind Core, Industrial, Hard Core, or any genre that requires crushing sound. The ML-2's ferocious and biting tone will complement and cut through any blast beats your rhythm section can create.

The new road-tough ML-2 offers ultra-heavy distortion with a sharp-edged attack. A LOW control provides a heavy low frequency sound *a la* 7-string guitar or dropped tuning while the HIGH control gives you a screaming, metallic tone.

Like all BOSS Compact pedals, the ML-2 is built like a tank and virtually indestructible.

Roland is a world leader in the design, manufacture, and distribution of electronic musical instruments, professional audio equipment, multimedia products, and music accessories.
