

# CDX-1

## Multitrack CD Recorder/ Audio Sample Workstation

# Sampling and Multitrack CD Recording in a Cool Tabletop Workstation!

The CDX-1 is a totally new type of workstation: part digital multitrack recorder, part phrase sampler, part CD burner. As such, it lets a new generation of CD-savvy musicians, songwriters and DJs sample or load in and combine their favorite grooves, create original music using the multitrack section, add effects, and burn it all to recordable CDs. There's never been a quicker or more convenient way to get your music to CD.

**COSM**

- Tabletop workstation which combines phrase sampling, multitrack recording, mixing and mastering directly to recordable CDs—a world's first!
- Digital multitrack recorder section can record 2 tracks simultaneously, 8 tracks total
- Load or sample audio phrases on built-in Sample Pads
- Onboard phrase sample tools provide easy waveform editing, high-quality time-stretching, BPM syncing, and more
- Sequence track and Rhythm Guide allows quick sample sequencing and song construction
- Stereo effects processors include COSM guitar multi-effects, groove effects, studio effects, Mastering Tool Kit and more
- CD Creation mode for writing directly to CD-R from stereo inputs—perfect for re-mastering vinyl records to CD
