

DB-900 D-Bass Amplifier

The Most Powerful Digital Bass Amp Ever!

The DB-900 D-Bass Amplifier is Roland's flagship bass amp, built to handle just about any gig imaginable. An extremely powerful combo amp, the DB-900 uses Feed Forward Processing (FFP) to maximize punch and clarity via a 320-watt amplifier and custom speaker cabinet system. Combined with built-in COSM Amp Modeling, split-frequency D-Chorus and programmable digital memories, the DB-900 is the ultimate digital bass amp for touring and recording professionals.

FFP COSM
