## **ROLAND ANNOUNCES SYSTEM UPGRADE FOR FANTOM G-SERIES** *New Version 1.10 Enhances Functionality of Flagship Workstation*

**Los Angeles, CA, June 20, 2008**— Roland is pleased to announce the release of v1.10 system upgrade for the Fantom-G series workstations, adding powerful multi-sampling capability, a new “Favorite Play” screen, a BPM calculator function for samples, and new enhancements to Single, Live and Song modes.

The Fantom-G series has redefined the boundaries of playability and creativity with its advanced sound engine, revolutionary ARX SuperNATURAL expansion bay, jumbo-sized color LCD, powerful new audio/MIDI recorder, and first-class 88-note Ivory Feel ([Fantom-G8](#)) and synth-action ([Fantom-G7](#) and [Fantom-G6](#)) keys.

The release of v1.10 adds a number of new features to the Fantom-G operating system:

- Powerful multi-sampling feature added to Patch Edit for assigning different samples to each key
- BPM calculator function for instantly determining the tempo of sample phrases
- New “Favorite Play” screen added to the Favorites mode
- New Undo and Record Cancel functions added to Song Mode
- New shortcuts added to Single, Effects and Song Modes
- Updated Input Settings screen combines input effects and level metering in one screen
- Other features and general system improvements

“This new update expands the realm of creative possibilities, and enables players to access the advanced features of the Fantom-G more quickly and easily,” explains Vince LaDuca, Product Marketing Manager for the Synths & Technology Division, “The quality and breadth of the enhanced features in v1.10 demonstrates Roland’s continuing commitment to making the Fantom-G series the best possible workstation for our customers.”
