

MICRO BR

A Pocket Sized Full Featured Digital Recorder

Stuff To Know

Revolutionary 4 track, 32 V-Track recorder from BOSS
Loaded with all of the sweet programmable BOSS guitar effects and COSM
Built in tuner, drums and condenser microphone with vocal effects
Pocket sized and battery operated for maximum portability
Everything you need to go from idea to fully mastered project ready to be burned to
CD via USB

Premier easy to use recording studio

- Selectable inputs to accommodate guitar, bass, keyboards, microphones or use the built in mic
 - Easy to access track buttons, just select the track from the front of the unit and start recording
 - Killer preset guitar COSM tones from BOSS for virtually every style, from acoustic to raucous rock and roll or create you own tones using the very intuitive operating system
 - Pro features including: overdubbing, looping, copy/paste, mix down and mastering.
 - Assign appropriate effects to appropriate inputs, such as guitar effects, vocal effects or line effects.
- Bounce your tracks down to a single track to create a project with an unlimited number of tracks without adding any additional noise using V_TRACK technology

Built in MP-3 player and Time stretcher

- Load your favorite MP3's via USB and take it on the road as a great alternative to a regular MP3 player
 - Jam along with your favorite MP3's or make your own with the built in MP3 converter.
- Time stretch your MP3's to slow them down so that you can practice every lick without changing the pitch!

The drummers built in

- Jam along with the metronome or use the high quality PCM sampled drum patterns to build your rhythm track into something awesome.
- Built in drum styles cover all genres of music including rock, pop, jazz, country, Latin styles and more!

Easy to Use

- Only a few buttons and dedicated track select buttons make recording a snap.
- Notice there's a dedicated button for just about everything you want to do. Effects? Press the EFFECT button. Rhythm? Press the RHYTHM button. Tuner? Hold the EFFECT and RHYTHM buttons together. It's so simple!!
- Control input volume for recording using the INPUT LEVEL dial located on the side of the unit.
- Control output volume with the VOLUME dial on the opposite side of the unit for over all volume to your headphones or speakers.

A Pocket Sized Full Featured Digital Recorder

Stuff To Show

Pocket Sized Recording Studio
Four Tracks and 32 V-Tracks
COSM FX, Built in Drums, On board Mic
MP-3 Player with Time Stretch and Center Cancel

Easily select your instrument input

- 1) Push the INPUT button
- 2) Push the corresponding TR1 thru TR4 buttons to select GTR, MIC, LIN or EXT
- 3) Adjust your instrument input level using the INPUT LEVEL wheel on the right side of the MICRO BR between 0 and 100.
- 4) Hit the INPUT button again to close.

Demonstrate the preset effects or make your own

Test Drive some patches that are featured in the MICRO BR:

- 1) Plug a guitar into the guitar input
- 2) Press the INPUT button, then Press TR1 button until display reads "GTR"
- 3) Press the EFFECT button. Select different patches using the + or - value buttons.
- 4) Once an effect is chosen, push TR2 to edit. (IF you want) When satisfied with your sound, press exit once.

P

Easy to use recorder

- 1) Plug into the MICRO BR and push the UTILITY button. Push TR1 to select song. Push TR2 to select "new". Push TR4 to select "EXE" to create your new song!
- 2) Before you get started, tune your guitar. Push the "EFFECTS" and "RHYTHM" buttons together to bring up the tuner.
- 3) Next select your guitar sound by pressing the "EFFECTS" button. Use the value keys and play your instrument to audition the sounds
- 4) Press the "EXIT" button. Turn on the drums by hitting the RHYTHM key. Push TR1 to turn on the drums, and TR2 to bring it into the arranger ("song") mode.
- 5) Push "STOP" and "REWIND" together to bring yourself to the top of the song. Now hit "RECORD" and "Play" to start recording.
- 6) To record another track, simply press the "TR2 thru TR4" button.

Time stretch MP-3's

Demonstrate the MP-3 timestretching the following way

- 1) Push the MP-3/trainer button.
- 2) Use the Cursor to the area that displays 100%.
- 3) Use the value +/- keys to change the percentage value up or down to speed up or slow down the song
