

- **A New Concept in Performance Keyboards**
  - **468 Awesome Roland Sounds**
  - **Progressive Hammer Action**
    - **SRXpandable**
  - **Sleek and Intuitive Interface**

### **A New Concept in Performance Keyboards**

- **The ultimate combination of performance synth and digital piano.**
- **85 usable rhythm patterns and arpeggiator for songwriting or playing live.**

### **Awesome Roland Sounds**

- **Our best stereo piano sounds along with 468 XV-quality sounds & GM2.**
- **128-voice polyphony means notes don't drop-out on long sustained piano runs or thick, multitrack sequences.**
- **Tone-wheel organ models with drawbar and rotary speaker control via front panel faders, knobs and graphic display.**
- **65 Multi FX algorithms from the XV-3080 plus Reverb & Chorus processors.**
- **Sympathetic Resonance emulates piano resonance with the sustain pedal.**

### **Progressive Hammer Action**

- **Our best hammer action with "progressive" weighting—like a real piano!**
- **101 Touch Sensitivity levels—storable per Setup**
- **Precision hammers make the RD-700 a dynamic and expressive instrument.**

### **SRXpandable**

- **Expansion means the RD-700 has unlimited lifespan and sonic potential.**
- **SRX Expansion Boards hold 64MB of brand-new Tones.**
- **Customize your RD-700 with any two of the growing SRX library:**

|                                 |                                   |
|---------------------------------|-----------------------------------|
| <b>SRX-01 Dynamic Drum Kits</b> | <b>SRX-03 Studio SRX</b>          |
| <b>SRX-02 Concert Piano</b>     | <b>SRX-04 Symphonique Strings</b> |

### **Sleek and Intuitive Interface**

- **Large, backlit graphic LCD display—easy to read in any lighting condition.**
- **Self-guiding menus with onscreen arrows for simple navigation.**
- **Plenty of dedicated faders and knobs for instant, realtime control of levels, effects processing, drawbars and more.**

### **A New Concept in Performance Keyboards**

**Play the Demo Songs—there's a lot more than piano here:**

- 1) Hold **WRITE** & press **NUM LOCK**.
- 2) Use the **CURSOR** buttons to select demo songs.
- 3) Press **INC/YES** to begin playback. Press **DEC/NO** to return to the song list.

### **Awesome Roland Sounds**

**Show the variety and quality of sounds:**

- 1) Press the **PIANO** button. This is a simple, one-step way to get a great piano.
- 2) Press a few of the **TONE SELECT** buttons and then press the **INC** & **DEC** buttons to show the variety under each category.

**Show the Tone Wheel Organ Drawbars:**

- 1) Press the **ORGAN** button, then **INC/YES** until you see "Tone Wheel 1".
- 2) Press the left **CURSOR** button to access the Drawbar screen.
- 3) Move the sliders to adjust the first four drawbars. Press any of the buttons above the sliders to adjust the upper drawbars.

### **Progressive Hammer-Action**

**Demonstrate Roland's finest Hammer Action:**

- 1) Turn down the volume and examine the feel of the key bed.
- 2) Compare the weight of the lowest keys (heavier) to the highest keys (lighter).
- 3) Compare the action of the RD-700 to other keyboards in your store.

### **SRXpandable**

- 1) Point out the easy access **Expansion A** and **B** buttons on the front panel.
- 2) Point out the expansion slot on the back-left of the RD-700.

### **Sleek and Intuitive Interface**

**Demonstrate the Setups, Rhythms and EFX in a few easy steps:**

- 1) Press the **SET UP** button and **INC/DEC** to choose "004 RHY: FUNK". The keyboard is Split with Slap Bass in the left and Tone Wheel Organ in the right.
- 2) Press the **RHYTHM** button to start the Funk pattern.
- 3) Play a note in the right hand and turn the **CONTROL** knob under **MULTI EFFECT** to change the Rotary Speaker speed.
- 4) Press the right **CURSOR** button to access the Drawbar screen and use the sliders to adjust the sound.
- 5) Press the right **CURSOR** two more times to access the Rhythm and Arpeggiator screen. Use the **INC/DEC** buttons to select Rhythm patterns.
