## ROLAND INTRODUCES RH-5 HEADPHONES

**Los Angeles, CA, January 14, 2010** — Roland's extensive lineup of headphone products gains a new addition with the RH-5 Headphones. Designed for comfort and quality sound at an affordable price, the RH-5 is a great choice for monitoring electronic musical instruments like digital pianos and digital drums, and they're also perfect for music lessons, studio recording, and general music listening.

High-performance drivers provide the RH-5 with dynamic, quality sound, and a natural response that's balanced over the entire frequency spectrum. The lightweight design features large, padded earcups for extreme comfort over long listening sessions, along with a secure fit that keeps the headphones in place even during dynamic drum playing.

The RH-5 also features a built-in conversion plug that accommodates both standard and mini headphone connectors. For more information, please visit [www.RolandConnect.com](http://www.RolandConnect.com).
