Introducing the next generation V-STUDIO, the V-STUDIO 700 provides the ultimate solution for creative music production through a complete offering of finely-tuned and tightly-integrated hardware and software.

The ultimate solution for music production

Cakewalk and Roland selected only the very best components in designing V-STUDIO 700. At the heart of the system is SONAR 8.5 Producer, the leading DAW in the market today. SONAR 8.5 Producer gives you everything you need for recording, composing, editing, mixing, and mastering. Cakewalk’s flagship instruments, Dimension Pro (included in SONAR 8.5 Producer) and Rapture, are also part of the software package.

The software is intelligently matched with state-of-the-art hardware that meets Roland’s high standards of quality and reliability. It includes the VS-700C V-STUDIO Console multifunction control surface and VS-700R V-STUDIO 18/24 I/O audio interface which has an integrated Roland Fantom VS hardware synthesizer based on the world-renowned Fantom synthesizer.

Taken as a whole, V-STUDIO 700 offers the “tactile feel” of working in a traditional studio, but in a way that takes advantage of everything modern technology has to offer. This system represents the best that software and hardware have to offer with amazing control, integration, and sound quality.
V-STUDIO 100 is the portable music production studio that lets you create, record, produce, and perform music with or without a computer. For Mac and Windows.

Guitarists have only dreamed about it until now — BOSS guitar effects and Roland’s breakthrough COSM modeling built right into powerful hardware and recording software. That’s the V-STUDIO 20. The V-STUDIO 20 matches the simplicity of a portable, hardware recording system with the power, flexibility, and control of modern computer-based recording. Whether you’re at home or on the road, you can easily connect a guitar or mic to the V-STUDIO 20 Hardware and dial up genuine BOSS sounds. Once you’re ready, record directly to your computer for further editing and mixing using Cakewalk Guitar Tracks recording software. Don’t settle for imitations — Roland, Cakewalk, and BOSS are names you can trust to deliver the best recording solutions for today’s musicians.

5 easy steps to recording guitar and vocals

1. Connect a guitar or microphone to the V-STUDIO 20 Hardware
2. Dial up the perfect guitar or vocal tone using genuine BOSS effects
3. Choose your backing tracks, add a harmony, and then play your parts
4. Use the V-STUDIO 20 Hardware as a control surface for mixing and playback
5. Master your song and then burn a CD or make an MP3

PLUS:
- Vocal mode with built-in harmony and pitch correction. Use standalone or in combination with guitar effects to create your own unique vocal sound
- COSM Effects Editor — Choose from 12 COSM modeled amps, choose from 50 BOSS or create your own presets
- 4 virtual pedal modules with dedicated effect controls
- Built-in Chromatic Tuner
- Built-in MIDI capabilities for recording and controlling your mix

BONUS CONTENT: Jam to 1 GB of loops, songs and backing tracks.

**What is the Bass Enhancer?**

The Bass Enhancer found in the MA-15DBK/MA-15D/MA-7ABK/MA-7A Stereo Monitors lets the user hear bass frequencies not normally audible through speakers this size. The Bass Enhancer is a DSP chip programmed using psychoacoustic principles that converts low frequencies into a series of overtones which the human ear cannot distinguish from the original low frequencies. This allows the listener to perceive bass frequencies outside of the normal range of the speaker cone, without over-driving the woofer. With the Bass Enhancer, the MA-15DBK/MA-15D/MA-7ABK/MA-7A Stereo Monitors offer a strong low-end in a very compact set of reference monitors.
