## **ROLAND ANNOUNCES AC-90 ACOUSTIC GUITAR PERFORMANCE AMP**

**Austin, TX, July 27, 2007**—Building on the popularity of the AC-60 Acoustic Guitar Amp, Roland announces the AC-90 Acoustic Guitar Amp. With 8-inch Neodymium speakers and a two-way speaker system for crystal clear highs and a punchy low-range, the AC-90 provides a powerful acoustic sound in a lightweight, easy to carry package.

Roland Division Manager Peter Swiadon relates, “The AC-90 is perfect for the solo artist or the guitarist in an ensemble act where acoustic guitar sounds often get lost or overpowered by other instruments. This new amp punches up the acoustic guitar presence on a small stage, or in an arena.”

Additional features include an impressive automatic Anti-feedback function, two independent channels—one with an XLR input and phantom power, Reverb/Delay for each channel, stereo multi-band chorus, a convenient on-board tilt stand and a durable carrying bag.

The new AC-90 mounts easily onto any standard speaker stand.

*Roland is a world leader in the design, manufacture, and distribution of electronic musical instruments, professional audio equipment, multimedia products, and music accessories.
