ROLAND ANNOUNCES SA-1000 STAGE AMPLIFIER

Compact, Lightweight Stage Amp Optimized for Organs and Digital Pianos

Anaheim CA, January 17, 2008—Roland is proud to announce the new SA-1000 Stage Amplifier, a super-lightweight and portable stage amp customized for use with organs such as new ATELIER series and digital pianos. In addition to being easy to operate and simple to set up, it reproduces every sound nuance from powerful bass to sparkling highs.

It is well-suited for a wide range of venues and events, from parties and special occasions to recitals and concerts in small-to-large halls.

The Organ Enhance button adds bass nuances to a sound, while the onboard Anti-feedback function automatically cancels unpleasant howling, allowing musicians to place the SA-1000 in once-problematic locations, such as behind the player—providing both onstage monitoring for the performer and audio projection to the audience.

The SA-1000 is equipped with Stereo Link, a useful feature that allows two SA-1000s to be cascaded into a PA system for small-scale performances and concerts. With Stereo Link, both SA-1000s combine for a total of 700 watts of power.

Roland is a world leader in the design, manufacture, and distribution of electronic musical instruments, professional audio equipment, multimedia products, and music accessories. For more information, contact Roland Corporation U.S., 5100 S. Eastern Ave., P.O. Box 910921, Los Angeles, CA 90091-0921, (323) 890-3700 (x3718 - for media use only), www.RolandUS.com.
