ROLAND UNVEILS LX-10 DIGITAL UPRIGHT GRAND PIANO *New Digital Piano Placed Above HP-207 with a Wide Customer Appeal*

Los Angeles, CA, January 15, 2009 — Roland is proud to introduce the new [LX-10 Digital Piano](#). Offering uncompromised piano quality in a small footprint with polished ebony and satin black finish cabinet, the LX-10 is an attractive addition to any home, school, or studio.

The LX-10 is equipped with a distinguished 6-speaker system that creates an enfolding sonic atmosphere just like that of an acoustic piano. Its sound also changes by opening or closing the lid as on an acoustic grand piano. The LX-10 features Roland's acclaimed PHA II Ivory Feel keyboard with Escapement for an unprecedented acoustic piano feel. The inner side of the keyboard lid is made of polished ebony, which beautifully shows the reflection of the keyboard and fingers while playing.

The LX-10 has an easy-to-use operation panel similar to that of the HP-207, making it ideal for playing in the home, in lessons, or in school. Its USB host port allows players to incorporate SMF, CDs, and audio data (.WAV) files into their performance.
